

Five cable system (with terr. input) for 8, 12, and 16 subscribers

- The ECO CNV 55 SAT IF amplifier and the ECO CVE 55 SAT IF tap-off can be used to quickly and easily create cascades for larger networks
- The tap-off has DC throughpasses (IN/OUT) in the SAT range
- The variable attenuators on the ECO CNV 55 allow 0-15 dB adjustment of the SAT signal and 0-17 dB in the terrestrial range. The SAT-IF amplifier has a slope of 5 dB (fixed) in the SAT range and 7-12 dB in the terrestrial range.
