

# Triax UNIX 32 - band IV/V aerial (UHF)

TRIAx UNIX aerials have been designed for UHF-reception.

With their excellent gain and excellent front to back ratios these aerials ensure superior TV reception. The aerials have been designed to ensure optimum reception even under difficult conditions. Easy and uncomplicated mounting is ensured by the snap-lock dipole house made of UV-resistant blue plastic.

The balun with capacitive signal transfer from the dipole ensures matching adjustment with lower insertion loss. At the same time galvanic corrosion between the different materials in contact with each other is avoided.

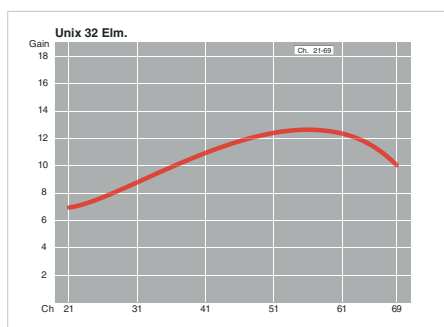

The aerials are made of salt water resistant aluminium, ensuring long service life.
